Fifth Conference on Applied Natural Language Processing

Association for Computational Linguistics

Descriptions of System Demonstrations and Videos

31 March - 3 April 1997
Washington Marriott Hotel
Washington, DC, USA

Published by the Association for Computational Linguistics
# TABLE OF CONTENTS

**Descriptions of System Demonstrations**

*Syntactic Structures of Sentences from Large Corpora*
Emmanuel Giguet and Jacques Vergne
Université de Caen ................................................................. 1

*An Efficient Two Stage Approach to Robust Language Interpretations*
Carolyn Penstein Rosé
Carnegie Mellon University ...................................................... 3

*Automating NL Appointment Scheduling with COSMA*
Stephan Busemann
DFKI ........................................................................................... 5

*Duke's Trainable Information and Meaning Extraction System (Duke TIMES)*
Amit Bagga and Joyce Yue Chai
Duke University ........................................................................... 7

*Dependency parser demo*
Timo Järvinen and Pasi Tapanainen
University of Helsinki ................................................................. 9

*An Improvement in the Selection Process of Machine Translation Using Inductive Learning with Genetic Algorithms*
Hiroshi Echizen-ya, Kenji Araki, Yoshikazu Miyanaga, and Koji Tochinai
Hokkaido University / Hokkai-Gakuen University ....................... 11

*CIRCSIM-Tutor: An Intelligent Tutoring System Using Natural Language Dialogue*
Martha W. Evens, Ru-Charn Chang, Yoon Hee Lee, Leem Seop Shim, Chong Woo Woo, Yuemei Zhang, Joel A. Michael, and Allen A. Rovick
Illinois Institute of Technology / Rush Medical College ................ 13

*NetOwl Server (and NetOwl Desktop)*
IsoQuest, Inc ............................................................................... 15

*Logos Machine Translation System*
Logos Corporation ...................................................................... 17

*A Broad-Coverage Word Sense Tagger*
Dekang Lin
University of Manitoba ............................................................... 18

*Microsoft Natural Language Understanding System and Grammar Checker*
Steve Richardson
Microsoft Research ................................................................... 20

*Two Multimodal Interfaces to Military Simulations*
Kenneth Wauchope
Naval Research Laboratory ......................................................... 21

*EAGLE: An Extensible Architecture for General Linguistic Engineering*
Breck Baldwin, Christine Doran, Jeffrey C. Reynar, Michael Niv, B. Srinivas
University of Pennsylvania ....................................................... 23
An English Grammar Checker as a Writing Aid for Students of English as a Second Language
Jong C. Park, Martha Palmer, and Gay Washburn
University of Pennsylvania .................................................................24

CATMORF: Multi two-level steps for Catalan morphology
Toni Badia, Angels Egea, and Antoni Tuells
University of Pompeu Fabra ...............................................................25

Software for Annotating Argument Structure
Wojciech Skut, Brigitte Krenn, Thorsten Brants, and Hans Uszkoreit
Universität des Saarlandes .................................................................27

GATE - a General Architecture for Text Engineering
Hamish Cunningham, Kevin Humphreys, Robert Gaizauskas, and Yorick Wilks
University of Sheffield .................................................................29

Multilingual NameTag, Multilingual Internet Surveillance System, and Multimedia Fusion System
SRA International ........................................................................31

NL Assistant: A Toolkit for Developing Natural Language Applications
Deborah A. Dahl, Lewis M. Norton, Ahmed Bouzid, and Li Li
Unisys Corporation ........................................................................33

Descriptions of Videos

BBN VALAD: Using Speech at the Logistics Anchor Desk
Madeline Bates and Rusty Bobrow
BBN Systems and Technologies ......................................................35

A Spoken Language Interface to a Virtual Reality System
Stephanie S. Everett, Kenneth Wauchope, and Manuel A. Pérez
Naval Research Laboratory / Recinto Universitario de Mayaguez ......................36
