## NEURAL COMPUTATION

### First Issue: Spring 1989

Editor-in-Chief

**Terrence Sejnowski**  
The Salk Institute and  
The University of California at San Diego

*Neural Computation* will provide a unique interdisciplinary forum for the dissemination of important research results and for reviews of research areas in neural computation.

Neural computation is a rapidly growing field that is attracting researchers in neuroscience, psychology, physics, mathematics, electrical engineering, computer science, and artificial intelligence. Researchers within these disciplines address, from special perspectives, the twin scientific and engineering challenges of understanding the brain and building computers. The journal serves to bring together work from various application areas, highlighting common problems and techniques in modeling the brain and in the design and construction of neurally-inspired information processing systems.

By publishing timely short communications and research reviews, *Neural Computation* will allow researchers easy access to information on important advances and will provide a valuable overview of the broad range of work contributing to neural computation. The journal will not accept long research articles.

The fields covered include neuroscience, computer science, artificial intelligence, mathematics, physics, psychology, linguistics, adaptive systems, vision, speech, robotics, optical computing, and VLSI.

*Neural Computation* is published quarterly by The MIT Press.

# New From MIT and Bradford Books

## **SPEAKING**

**From Intention to Articulation**

**Willem J. M. Levelt**

In this remarkably balanced and comprehensive treatment, Willem "Pim" Levelt, Director of the Max-Planck-Institute for Psycholinguistics, covers the entire process of speech produc-

tion, from message formulation to articulation to self-evaluation of speech.

*Speaking: From Intention to Articulation* inaugurates the ACL-MIT Series in Natural-Language Processing, edited by Aravind Joshi. A Bradford Book. \$39.95

## **ENGLISH SYNTAX**

**C. L. Baker**

Baker offers an informal but systematic discussion of the basic rules of English sentence structure, incorporating the fundamental insights that have been brought to the field of English syntax by research in generative grammar and introducing the goals and techniques of syntactic study.

\$27.50

## **AN ESSAY ON STRESS**

**Morris Halle and**

**Jean-Roger Vergnaud**

Over the course of a decade, the authors have developed a theory that provides a local account of all "action at a distance." They describe, illustrate, and defend a universal framework for the characterization of the patterns of word and phrase stress found the world over.

\$25.00

*Original in Paperback*

## **A COURSE IN GB SYNTAX**

**Lectures on Binding and Empty Categories**

**Howard Lasnik and Juan Uriagereka**

"Lasnik's lectures . . . are a model of clarity and insight. . . they lead the reader, carefully and lucidly, to the borders of current research. The book should prove extremely useful for intermediate or advanced courses, and . . . anyone concerned with the nature of language or engaged in research in linguistics."—Noam Chomsky, MIT

\$15.00 paper

## **JAPANESE TONE STRUCTURE**

**Janet B. Pierrehumbert and**

**Mary E. Beckman**

A thorough, phonetically grounded description of accent and intonation in Tokyo Japanese leading to the development of a general theory of surface representation of prosodic structure in all languages.

\$15.95 paper

*New in Paperback*

## **THE REPRESENTATION OF (IN)DEFINITENESS**

**edited by Eric J. Reuland and**

**Alice G.B. ter Meulen**

*The Representation of (In)definiteness* collects the most important current research on a central theoretical issue

in linguistics: characterizing the distinction between definite and indefinite expressions.

# ACL 1988 DUES STATEMENT

*Institutions Now Order Journals from MIT Press; New LATE PAYMENT FEE for Late Renewals*

Membership in the *Association for Computational Linguistics* is for the calendar year; it includes the *ACL* journal *Computational Linguistics*, reduced registration at most *ACL*-sponsored conferences, and discounts on *ACL*-sponsored publications. Beginning in 1988, MIT Press will publish the journal. This change will not affect personal and student memberships, which will continue to be handled by the *ACL*; however, institutions now must subscribe to the 1988 journal from MIT Press Journals, 55 Hayward Street, Cambridge, MA 02142 USA; 617:253-2889. Back issues through 1987 and proceedings will continue to be available only from *ACL*. An order form is on the other side of this statement. The change in publishing makes it necessary to introduce a late payment fee for renewal payments made after 30 April, because of the extra mailing costs. Dues and back order payments can be made in Europe and Japan as well as the U.S.; read the directions under the heading **PAYMENT** below carefully. Identify your institutional affiliation if it is not part of your address. Also please provide your computer network address.

Please correct any errors in the label provided. *Provide prompt notification of address changes; copies returned because of bad addresses will not be remailed until a \$3.00 handling fee is remitted.*

**MEMBERSHIP DUES FOR 1988:** Dues for *Personal Members* are \$25. Couples with the same mailing address may become *Joint Members* for \$30; they will receive only one set of publications, but each will be eligible for all other member benefits. Full-time students may become *Student Members* for \$15 with copy of student ID.

**INTERNATIONAL FUND:**

INTERNATIONAL FUND \$ \_\_\_\_\_

The *ACL* set up a fund in 1982 to make *ACL* memberships and publications available to colleagues who have difficulty in using their national currencies for international transactions. Contributions may be tax-deductible in the United States and in some other countries; check local regulations.

**PAYMENT:** Prepayment is necessary; invoices are available on request. Checks should be made out to the *Association for Computational Linguistics* (or to *ACL*). Payments can be made to one of the addresses below, as follows:

1. In the USA to Walker; mail this dues statement with a check or money order in U.S. dollars, *payable to ACL*.
2. In Switzerland to Rosner; mail this dues statement with a check or money order in U.S. dollars, Swiss francs, or the equivalent in local currency on the day of payment, *payable to ACL*. Payment can also be made by bank transfer to account number 141.880.LAV at the Union Bank of Switzerland, 8 rue de Rhone, CH-1211 Geneva 11, SWITZERLAND. Send Rosner a copy of the bank transfer as well as the dues statement. Standing orders can be established only with bank transfers.
3. In Japan to Nagao; transfer an equivalent amount in yen on the day of payment to "Dai-ichi Kangyo Bank, Hyakumanben Branch; Ordinary Deposit, 476-1319944; Name: Keisangengogakkai Kaihi Nagao Makoto." Mail this dues statement to Walker together with a copy of the bank transfer. Also send Nagao a copy of the bank transfer. Note: **THE DUES STATEMENT MUST BE SENT TO WALKER TO BE PROPERLY RECORDED IN THE ACL OFFICE.**

## Guidelines for Submissions

Manuscripts submitted to **Computational Linguistics** should be typed on letter-size paper (8.5 by 11 inches, or A4), double-spaced throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150-250 words. Manuscripts must be submitted in English.

Submissions may be made in any of the following categories:

**PAPER:** This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but we suggest that manuscripts be limited to forty double-spaced pages. That is the equivalent of twelve journal pages. Each paper is fully refereed, being read by at least two members of the editorial board and usually by an additional expert in the particular subject area.

The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a "work for hire", by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

**TECHNICAL CORRESPONDENCE:** This category includes short articles reporting preliminary results of some project in progress, or the results of other studies of interest to the readership. Technical correspondences should not generally exceed eight double-spaced pages. Each technical correspondence is reviewed by at least two members of the editorial board before acceptance.

**LETTERS TO THE EDITOR:** This includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers, technical correspondences, and letters should be sent to the Editor:

James F. Allen, CL Editor  
Department of Computer Science  
The University of Rochester  
Rochester, NY 14627, USA  
ARPANET:acl@cs.rochester.edu

Anyone interested in reviewing a book, or in suggesting a book for review, should contact the Book Review Editor; publishers may also submit copies of books for review directly to the Book Review Editor:

Graeme Hirst, CL Book Review Editor  
Department of Computer Science  
University of Toronto  
Toronto, CANADA M5S 1A4  
CSNET:gh@ai.toronto.edu

The Finite String Editor should receive (a) copies of technical reports and reprints of papers published elsewhere – or at least citation information and abstracts of such items and of books and monographs; (b) summaries of research in progress – of particular interest would be perspectives on the activities at a particular institution; (c) announcements of meetings of potential interest to the membership; and (d) personal notes (e.g., honors, moving, changes in status). Two copies of submissions should be sent to the Finite String Editor:

Ralph Weischedel, Finite String Editor  
BBN Laboratories Inc.  
10 Moulton Street  
Cambridge, MA 02238, USA  
ARPANET:weischedel@g.bbn.com

Fuller instructions about the format of submissions can be found in the first issue of each volume.

**NOTE** All submissions other than papers should reach the pertinent editor *no later than* the 15th of the first month of each quarter.
