Machine Translation

Editor:

Harold Somers

Centre for Computational Linguistics, UMIST, Manchester, UK

Honorary Editor:

Sergei Nirenburg

New Mexico State University, Las Cruces, USA

While respecting its historical link with the field of MT, *Machine Translation* is changing and broadening its scope of interest to encompass all branches of Computational Linguistics and Language Engineering, wherever they incorporate a MULTILINGUAL aspect. We therefore welcome submissions to the journal on THEORETICAL, DESCRIPTIVE OR COMPUTATIONAL ASPECTS of any of the following topics:

- machine translation and machine-aided translation
- human translation theory and practise multilingual text composition and generation
- multilingual information retrieval
- multilingual natural language interfaces
- multilingual dialogue systems
- multilingual message understanding systems
- corpus-based and statistical language modelling
- connectionist approaches to translation compilation and use of bi- and multilingual corpora
- discourse phenomena and their treatment in (human or machine) translation
- knowledge engineering
- contrastive linguistics
- morphology, syntax, semantics, pragmatics
- computer-aided language instruction and learning
- software localization and internationalization
- speech processing, especially for speech translation
- phonetics, phonology
- computational implications of non-Roman character sets
- multilingual word-processing
- the multilingual information society (sociological and legal as well as linguistic aspects)
- minority languages
- history of machine translation.

We would also welcome your suggestions about other features you would like to see in this journal, for example, special issues, squibs, topical comment.

Journal of Logic, Language and Information

Managing Editor:

Dag Westerståhl

Dept. of Philosophy, Stockholm University, Sweden

Editorial Assistant:

Simon Winter

This is the official publication of the European Association for Logic, Language, and Information. The scope of the journal is the logical and computational foundations of natural, formal, and programming languages, as well as the different forms of human and mechanized inference. It covers the logical, linguistic, and information-theoretic parts of the cognitive sciences. Examples of main subareas are Intensional Logics including Dynamic Logic; Nonmonotonic Logic and Belief Revision; Constructive Logics; Complexity Issues in Logic and Linguistics; Theoretical Problems of Logic Programming and Resolution; Categorical Grammar and Type Theory; Generalized Quantification; Information-Oriented Theories of Semantic Structure like Situation Semantics, Discourse Representation Theory, and Dynamic Semantics; Connectionist Models of Logical and Linguistic Structures. The emphasis is on the theoretical aspects of these areas. The purpose of the journal is to act as a forum for researchers interested in the theoretical foundations of the above subjects and their interdisciplinary connections, with an emphasis on general ideas increasing coherence.

Association for Computational Linguistics
1998 MEMBERSHIP, CHANGE OF ADDRESS AND EMAIL, AND ORDER FORM
MEMBERSHIP

Membership in the Association for Computational Linguistics is for the calendar year, regardless of when dues are paid. Membership includes a full year of the ACL journal, Computational Linguistics, reduced registration at most ACL-sponsored conferences, and discounts on ACL-sponsored publications. Payments for membership dues, fund donations, back issues, and proceedings may be made in Europe or the USA. Follow the instructions under the PAYMENT heading carefully. *Provide all personal information, even if you have previously done so, to be sure the ACL membership database is up-to-date. Write legibly, please! Do not fill in your name/address unless the mailing label below is incorrect.*

FULL NAME _____
(first) (last/family)

ADDRESS _____

INSTITUTION _____ TELEPHONE _____
(if not in address above)

E-MAIL ADDRESS _____ FAX _____

Please IMMEDIATELY notify the ACL Office of address and email changes. Journal copies returned due to bad addresses will not be remailed until a \$5.00 postage/handling fee is remitted. EMAIL (if available) IS USED TO DISTRIBUTE meeting, membership, and other announcements.

MEMBERSHIP DUES FOR 1998

IMPORTANT NOTE: Renewals must be received no later than 1 April 1998 to avoid late payment fee assessment. Membership categories include Regular Members and the following: Couples with the same mailing address may be Joint Members; they will receive only one set of publications, but each will be eligible for all other member benefits. Students taking a full-time program of courses and not earning a regular income may become Student Members **WITH COPY OF CURRENT STUDENT ID**. Students who are not Student Members because of their income can still participate in student activities as Student-Employed. Also available are Retired and Unemployed memberships. **PLEASE CIRCLE / HIGHLIGHT TYPE OF MEMBERSHIP BELOW THAT YOU DESIRE. Late payment fee does not apply to new memberships.**

Guidelines for Submissions

Manuscripts for **Computational Linguistics** should be submitted on letter-size paper (8.5 by 11 inches, or A4), double-spaced and single-sided throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150–250 words. Manuscripts must be written in English. Contact the editor regarding the possibility of electronic submission.

Submissions may be made in any of the following categories:

Papers: This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but it is suggested that manuscripts be limited to forty double-spaced pages. That is the equivalent of thirty journal pages. Each paper is fully refereed by three or four experts in the field. Manuscripts may also be submitted electronically; consult <http://www.cs.columbia.edu/~radev/acl/submit.txt> for instructions and pointers to the L^AT_EX style files. The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a "work for hire," by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

Letters to the Editor: This category includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers or three copies of letters should be sent to:

Julia Hirschberg, CL Editor
AT&T Labs-Research
180 Park Avenue, A237
Florham Park, NJ 07932-0971
(+1 973) 360-8330; acl@research.att.com

Squibs and Discussions: This category includes short articles reporting technical results, discussions of results, algorithms, or new computational linguistic data or tools of interest to the journal readership. Submission format is the same as for regular papers, but the length should in no case exceed eight journal pages. Electronic submissions (L^AT_EX source, postscript or plain text) are welcome and should be submitted to:

Founded in 1962, the Association for Computational Linguistics (ACL) is the primary scientific and professional society for natural language processing research and applications. A European chapter was established in 1982. Besides publishing *Computational Linguistics*, the ACL holds international meetings (annually in North America, biennially in Europe) where the state-of-the-art in natural language processing research and development is presented. Recently, special interest groups on the Mathematics of Language, the Lexicon, Parsing, Generation, Computational Phonology, Multimedia Language Processing, and Very Large Corpora have been formed; others are likely to be added.
